

**AMENDMENTS TO THE CLAIMS:**

Kindly amend claim 3, and add new claim 4, as shown below.

This listing of claims will replace all prior versions and listings of claims in the

Application:

**Claim 1 (original).** A noncontact conductivity measuring instrument using a microwave, the noncontact conductivity measuring instrument characterized by including:

an oscillator which performs oscillation of the microwave;

a circulator which is connected to the oscillator;

a horn antenna which is connected to the circulator, the horn antenna transmitting the microwave to a sample and receiving a reflected wave;

a detector which is connected to said circulator, the detector outputting a voltage proportional to a square of magnitude of the received microwave; and

computing means for inputting said voltage to compute conductivity.

**Claim 2 (original).** A noncontact conductivity measuring instrument according to claim 1, characterized in that said circulator is in contact with the oscillator through an isolator.

**Claim 3 (currently amended).** A noncontact conductivity measuring instrument according to ~~claims 1 or 2~~claim 1, characterized in that a frequency of the microwave oscillating in said oscillator is 94 GHz when a silicon wafer is measured.

**Claim 4 (new).** A noncontact conductivity measuring instrument according claim 2, characterized in that a frequency of the microwave oscillating in said oscillator is 94 GHz when a silicon wafer is measured.
